

October 4, 1949

South and West Field Irrigation Company  
Cedar City, Utah

Cedar City Corporation  
Cedar City, Utah

Gentlemen:

RE: COAL CREEK DISTRIBUTION

This is to remind you that you were, under date of April 12, 1949, required to submit to this office, plans and specifications for a control head gate that might be set and locked, and for a Parshall flume to measure the water at the head of your joint canal.

You are urged to submit the plans and specifications hereinabove referred to, and referred to in my letter to you dated April 12, in which it was required that the installations be made before the irrigation season of 1950.

Yours very truly,

Harold A. Linke  
STATE ENGINEER

FWC/vm
